DETAILED ACTION

1. Claims 21-36 are pending in this application.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21 (in part), 27-32 and 35-36 (in part), drawn to 1,2,4-oxadiazine compounds (see compound of formula III), classified in class 544, subclass 66.
 - II. Claims 21 (in part), 22-26, 33-34 and 35-36 (in part), drawn to others, classified in classes 546, 544, 564, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Groups I-II are directed to structurally dissimilar compounds such that the variable core created by the varying definitions of variables in formulae I-III do not belong to the same recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others. Group I is drawn to 1,2,4-oxadiazines (six-membered ring with an oxygen and two nitrogens) and is different from Group II that is drawn to others e.g. pyridines, morpholines, etc. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structure equivalents of each other.

Art Unit: 1624

If applicants elect Group II, an election of a single disclosed species is required.

Note that further restriction maybe required.

Because these inventions are distinct for the reasons given above and have acquired separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made on Jan. 25, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
